

# Section V: Membrane Lamination

The Membrain™ laminator equipment is a self-contained system capable of laminating membrane switches and overlays precisely, simply and accurately. While our customers experience a quick payback because of increased speed, the improved quality and low scrap rate are very powerful reasons to add our machine to any membrane switch manufacturing facility. We offer two standard size laminating stations and custom options to fit your needs.

The Membrain™ laminator is available in two models, as described in the table, below.

	MEMBRAIN-200	MEMBRAIN-300
--	--------------	--------------

**Overall Size**

	MEMBRAIN-200	MEMBRAIN-300
<b>Width</b>	68.0-inches	78.0-inches
<b>Depth</b>	48.0-inches	48.0-inches
<b>Height</b>	38.0-inches	38.0-inches
<b>Weight</b>	400 lbs.	400 lbs.

**Vacuum Area**

	MEMBRAIN-200	MEMBRAIN-300
<b>Depth</b>	24.0-inches	30.0-inches
<b>Width</b>	24.0-inches	24.0-inches

**Roller**

	MEMBRAIN-200	MEMBRAIN-300
<b>Width</b>	24.5-inches	30.5-inches
<b>Diameter</b>	3.0-inches	3.0-inches
<b>Lift</b>	1.0-inches	1.0-inches
<b>Durometer</b>	70	70

**Utility Requirements**

	MEMBRAIN-200	MEMBRAIN-300
<b>Air</b>	92cfm @ 90 PSI	92cfm @ 90 PSI
<b>Power</b>	110V/60Hz/2A	110V/60Hz/2A
